

THE CHALLENGE

Eli Lilly was in the process of consolidating its R&D facility in Europe and had determined that the majority of the equipment in its Mont-Saint-Guibert, Belgium facility was surplus to the ongoing operations.

This two-building facility contained a mix of lab and analytical equipment as well as some pilot scale API equipment; all of which needed to be sold and removed in a timely manner in order to successfully complete its consolidation project.

THE SOLUTION

Given a tight deadline to complete this disposition project, EquipNet opted to deploy a two-tier sales plan that entailed several months of managed pricing by the Direct Sales Force, and an auction event to complete the clearance of the Belgian facility's assets.

- **Project Management**
- **Individual Asset Sales**
- **Dedicated Online Auction**
- **Worldwide Logistics**

CLIENT OVERVIEW

Eli Lilly is a leading pharmaceutical company that develops vaccines and medicines to treat an array of illnesses and medical conditions. Eli Lilly is consistently ranked among the top 10 pharmaceutical companies on the planet and has facilities worldwide.

THE RESULT

By marketing the Eli Lilly assets with end-user buyers in mind, EquipNet was able to sell 160 premium assets through the online MarketPlace™, and the remaining 150 assets in a webcast auction event. At the project's end, EquipNet returned more than €2,200,000 in sales proceeds to Eli Lilly; adhering directly to its provided time frame and going well beyond the client's expectations.
